# BLACK MAGIC

The PC-killer

**Up close**  
The deal makers

**Operation**

Its 3.4-inch display is touch-sensitive, so you can caress it and make it respond to your whims

**Output**

The web-enabled inkjet machine uses a 5-colour printing process so you get crisp text and vivid photos

Its devices like these that make us worry about the bleak future of PCs on one hand, and on the other, wonder how something so versatile and functional can look so sexy. Consider this – the new **HP Photosmart Premium C309G** prints, scans and copies; lets you adjust brightness, crop and rotate photos; access online albums at Snapfish; and print directly from your memory cards, iPhone or Sony PS3 – all without the switching the PC on! The convenience of a flatbed scanner, auto duplexing, and support for a wide variety of media mean you would want one both at home and in the office
